Advantages of the **American College of Physical Education**

¶ *The College is located in Chicago, the great metropolis of the west and the second largest city in America. This great city affords in addition to its unsurpassed advantages for culture and recreation the following special opportunities to students of physical education:*

Access to the Art Institute, Museums and great Public Libraries. A chance to attend contests on the big athletic fields of great Universities. An opportunity to study the Chicago playground system, the greatest in the world. Unusual opportunities for practise teaching in the many institutions in Chicago which have physical activities.

We claim to have the finest college building in the country for the purpose of physical training. Two spacious halls, one of which is an auditorium 125x70, seating over 1500 people, gives ample room for drills of various kinds. The other, a gymnasium, is 90x60 feet in size, giving a clear floor space of 5400 square feet. Both are well lighted and ventilated.

Other Special Advantages Include:

A well appointed women's dormitory with wholesome environment. A broad curriculum including every phase of physical education, instruction being given according to the best modern ideas of physical training.

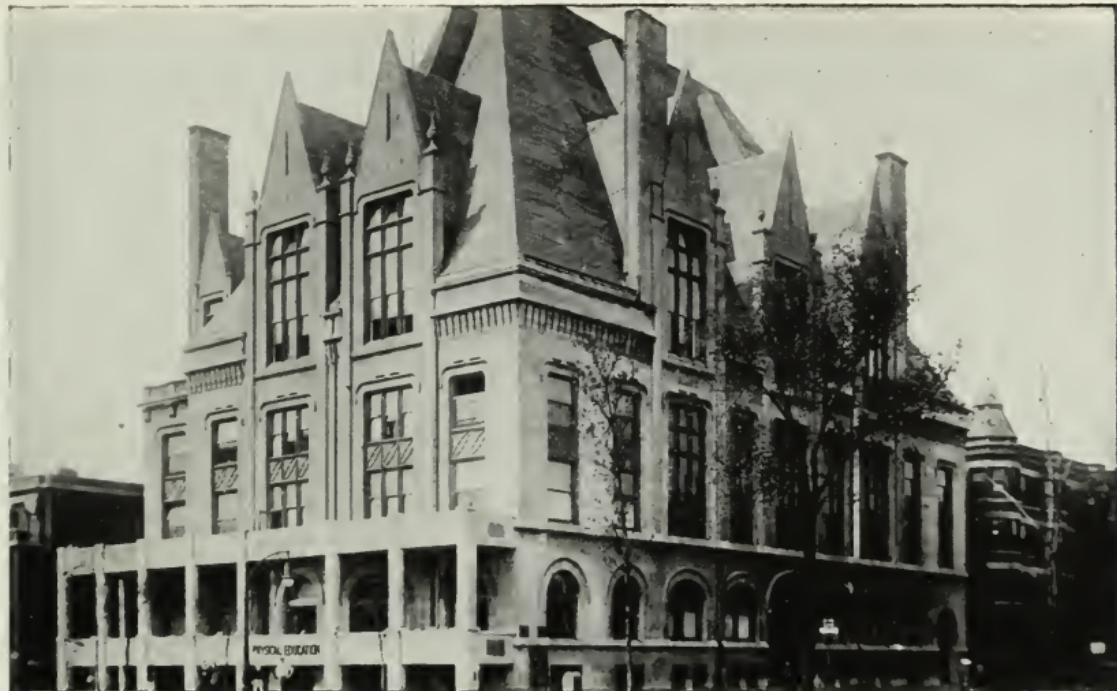

A strong faculty of specialists, many of them leading instructors in physical training in the public schools, colleges, universities and playgrounds of Chicago.

A well organized free Appointment Bureau to secure positions for the graduates of the College.

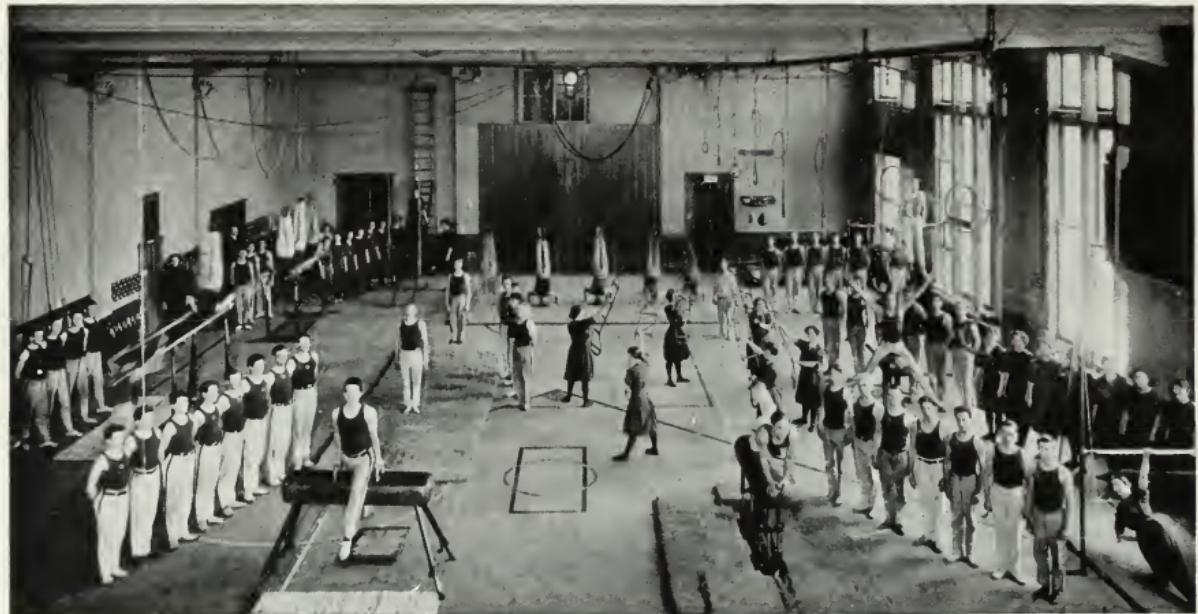

The American College is authorized by the Board of Education of the City of Chicago to offer "promotional credit" work to teachers in the Chicago Public Schools.

Graduates of the American College are admitted to the Civil Service examinations for certificates as teachers of physical education in the Chicago Public Schools.

The American College, also, is recognized by the State Superintendent of Instruction and the State Examining Board of Illinois as a fully accredited institution.
